

Baby Referral Form

At Beyond Pediatric Dentistry, we strive for *optimal* outcomes for you and your baby. In order to ensure that we meet your goals, we recommend seeing a “functionalist” prior to seeking a baby consult in our office. Who is a functionalist? This is a designated professional that looks at the baby’s function at the breast, bottle, or with solids. It can be a lactation consultant, IBCLC, feeding therapist (speech language pathologist or occupational therapist who specializes in infant feeding therapy).

Please have your functionalist fill this form. Please return via fax or email.

I am referring _____ (DOB _____) to your office to evaluate the following:

____ lip tie

____ buccal ties (specify location: _____)

____ tongue tie

Family information:

Mom: _____ Dad: _____

Cell phone: _____

Email: _____

Functionalist Recommendations:

____ I have assessed the baby’s function and believe he/she is ready for a release.

____ I have assessed the baby’s function and believe baby needs more time to get ready.

____ I have assessed the baby and made the following referrals:

If a release is recommended, I need to see the patient back ____ days post release.

Sincerely,

Date: _____
